Integrated PG Program in Information Technology

The **best**
way to predict the
future is to be it

By 2010, IT professionals will need to possess expertise in multiple domains.

Technical aptitude will no longer be enough.

More than 6,00,000 engineers graduate every year. But, in reality, only about one out of four of them is industry ready. This is a classic case of supply falling far short of demand.

What's more, the requirements of the industry have changed drastically. It no longer suffices to be technically proficient. IT professionals must prove that they can understand business realities, industry and customer bases, core processes & regulatory environment, culture & constraints.

Versatility will be the major deciding factor.

Accelerate your career

..... Integrated PG Program in Information Technology

all you need is a
great start

The \$87 Billion Indian IT-ITES industry is looking for professionals who can also assume business roles.

To make a mark in this highly competitive industry which seeks holistic candidates who are both technically and business savvy, you need to accelerate your career right away. This can only happen via:

Developing in-depth holistic skills

Individuals with technical skills are in abundance. But a majority of them falter when it comes to life-skills. When the real world demands an individual equally adept at the keyboard and the boardroom, the training environment has to be restructured accordingly.

Learning that makes you valued

It is from continuous innovation, adoption of a new training program with industry oriented course ware, work life simulated projects and mentored guidance from the experts in the field that professionals of tomorrow will evolve.

Accelerate your career

Integrated **PG Program** in Information Technology

Aspire Accelerate Achieve

At CL IBM Academy, you acquire all the requisite training, skills and expertise you need to sprint ahead in the industry.

CL IBM Academy, a partnership between IBM and Career Launcher, brings to you the first-ever Industry Certified Integrated Skill Development Program for fresh Engineering, BCA and MCA graduates who want to make that quantum leap in the world of IT and ITES industries.

With the amalgamation of two expert powerhouses at CL IBM Academy, you as a student, stand to gain by:

1. Achieving industry recognized professional certification
2. Becoming more employable - be the preferred source of recruitment for IT/ITES companies
3. Making a more informed career decision
4. Being ready for professional deployment as a global employee from day one

By evolving individuals who come equipped with skills and expertise in sync with the industry requirements, CL IBM Academy is equally beneficial for clients and partners by providing them with

1. Ease of recruitment
2. Reduced cost of entry level training
